

Vim Cheat Sheet

Global	Editing	Cut and paste	Working with multiple files	Tabs
:help keyword - open help for keyword	r - replace a single character	yy - yank (copy) a line	:e filename - edit a file in a new buffer	:tabnew filename or :tabn filename - open a file in a new tab
:o file - open file	J - join line below to the current one	2yy - yank (copy) 2 lines	:bnext or :bn - go to the next buffer	Ctrl + wT - move the current split window into its own tab
:saveas file - save file as	cc - change (replace) entire line	yw - yank (copy) the characters of the word from the cursor position to the start of the next word	:bprev or :bp - go to the previous buffer	gt or :tabnext or :tabn - move to the next tab
:close - close current pane	cw - change (replace) to the end of the word	y\$ - yank (copy) to end of line	:bd - delete a buffer (close a file)	gT or :tabprev or :tabp - move to the previous tab
Cursor movement	c\$ - change (replace) to the end of the line	p - put (paste) the clipboard after cursor	:ls - list all open buffers	#gt - move to tab number #
h - move cursor left	s - delete character and substitute text	P - put (paste) before cursor	:sp filename - open a file in a new buffer and split window	:tabmove # - move current tab to the #th position (indexed from 0)
j - move cursor down	S - delete line and substitute text (same as cc)	dd - delete (cut) a line	:vsp filename - open a file in a new buffer and vertically split window	:tabclose or :tabc - close the current tab and all its windows
k - move cursor up	xp - transpose two letters (delete and paste)	2dd - delete (cut) 2 lines	Ctrl + ws - split window	:tabonly or :tabo - close all tabs except for the current one
l - move cursor right	u - undo	dw - delete (cut) the characters of the word from the cursor position to the start of the next word	Ctrl + ww - switch windows	:tabdo command - run the command on all tabs (e.g. :tabdo q - closes all opened tabs)
w - jump forwards to the start of a word	Ctrl + r - redo	D - delete (cut) to the end of the line	Ctrl + wq - quit a window	
W - jump forwards to the start of a word (words can contain punctuation)	. - repeat last command	d\$ - delete (cut) to the end of the line	Ctrl + wv - split window vertically	
e - jump forwards to the end of a word	Marking text (visual mode)	x - delete (cut) character	Ctrl + wh - move cursor to the left window (vertical split)	
E - jump forwards to the end of a word (words can contain punctuation)	V - start linewise visual mode	Exiting	Ctrl + wl - move cursor to the right window (vertical split)	
b - jump backwards to the start of a word	o - move to other end of marked area	:w !sudo tee % - write out the current file using sudo	Ctrl + wj - move cursor to the window below (horizontal split)	
B - jump backwards to the start of a word (words can contain punctuation)	Ctrl + v - start visual block mode	:wq or :x or ZZ - write (save) and quit	Ctrl + wk - move cursor to the window above (horizontal split)	
O - jump to the start of the line	O - move to other corner of block	:q - quit (fails if there are unsaved changes)		
^ - jump to the first non-blank character of the line	aw - mark a word	:q! or ZQ - quit and throw away unsaved changes		
\$ - jump to the end of the line	ab - a block with ()			
g_ - jump to the last non-blank character of the line	aB - a block with {}	Search and replace		
gg - go to the first line of the document	ib - inner block with ()	/pattern - search for pattern		
G - go to the last line of the document	iB - inner block with {}	?pattern - search backward for pattern		
5G - go to line 5	Esc - exit visual mode	\vpattern - 'very magic' pattern: non-alphanumeric characters are interpreted as special regex symbols (no escaping needed)		
fx - jump to next occurrence of character x	Visual commands	n - repeat search in same direction		
tx - jump to before next occurrence of character x	> - shift text right	N - repeat search in opposite direction		
} - jump to next paragraph (or function/block, when editing code)	< - shift text left	:%s/old/new/g - replace all old with new throughout file		
{ - jump to previous paragraph (or function/block, when editing code)	y - yank (copy) marked text	:%s/old/new/gc - replace all old with new throughout file with confirmations		
Ctrl + b - move back one full screen	d - delete marked text	:noh - remove highlighting of search matches		
Ctrl + f - move forward one full screen	~ - switch case			
Ctrl + d - move forward 1/2 a screen	Registers	Search in multiple files		
Ctrl + u - move back 1/2 a screen	:reg - show registers content	:vimgrep /pattern/ {file} - search for pattern in multiple files		
Insert mode - inserting/appending text	" xy - yank into register x			
i - insert before the cursor	" Op - paste contents of register x			
I - insert at the beginning of the line	Marks	:cn - jump to the next match		
a - insert (append) after the cursor	:marks - list of marks	:cp - jump to the previous match		
A - insert (append) at the end of the line	ma - set current position for mark A	:copen - open a window containing the list of matches		
o - append (open) a new line below the current line	`a - jump to position of mark A			
O - append (open) a new line above the current line	y`a - yank text to position of mark A			
ea - insert (append) at the end of the word	Macros			
Esc - exit insert mode	qa - record macro a			
	qq - stop recording macro			
	@@ - rerun last run macro
